Laboratory of Artificial Intelligence for Cognitive Sciences (AICS)

Dr. Soroosh Shalileh
Head of AICS and Research fellow at CLB

AICS in few words

- We are a group of young, self-organized and well-motivated researchers with a lifelong commitment to learning and passion for positively influencing the world.

- We have built a supportive and friendly environment where teamwork is encouraged, and learning is shared freely.

Research at AICS

- Two research directions:

  - (i) studying human cognitive science >> applied AI projects >> Technological developments.

  - (ii) developing new mathematical methods and algorithms >> more robust and power full computation methods are being developed.

- Examples of (i): Identifying dyslexia, Detection Schizophrenia/Depression, Language acquisition process, …

- Examples of (ii): Developing multi-model computation approaches, Developing novel deep clustering algorithms, Data2Model complexity mapping, Refining stochastic gradient descent optimization, …
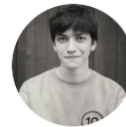

-

AICS Team

Шалилех Соруш Ахмад

Заведующий лабораторией

Алвандян Тигран Аршакович

Стажер-исследователь

Каиров Матвей Вадимович

Стажер-исследователь

Ковалева Александра Ивановна

Стажер-исследователь

Крылова Мария Владимировна

Стажер-исследователь

**Лобашова Алина Александровна**

Стажер-исследователь

Попков Антон Витальевич

Стажер-исследователь

- Being hired: Artyom Veresnikov, Farhana Nour, Nikita Protsanov, Sharmi Islam, ...

- Writing thesis/volunteers: Anna Kazachkova, ...

We are open to new collaborations, feel free to contact me:
