Instructions how to use Safe Exam Browser for exams on StartExam and SmartLMS platforms

Safe Exam Browser(SEB) is designed for secure online exams. It allows you to regulate access to PC sites and applications and prevents forbidden use of unauthorized resources. SEB is a main browser that must be used during the exam, unless students are instructed to use other browsers by instructors.

If another browser is used during the exam results may not be scored.

To launch the browser you should press the Safe Exam Browser icon on your desktop or in the Start menu.

Safe Exam Browser control units

During the exam, Safe Exam Browser:

Blocks access to third-party Internet resources

Blocks access to computer software applications

Blocks TeamViewer, AnyDesk, etc. applications.

Closes access to the address bar

Blocks downloading files from unauthorized sources

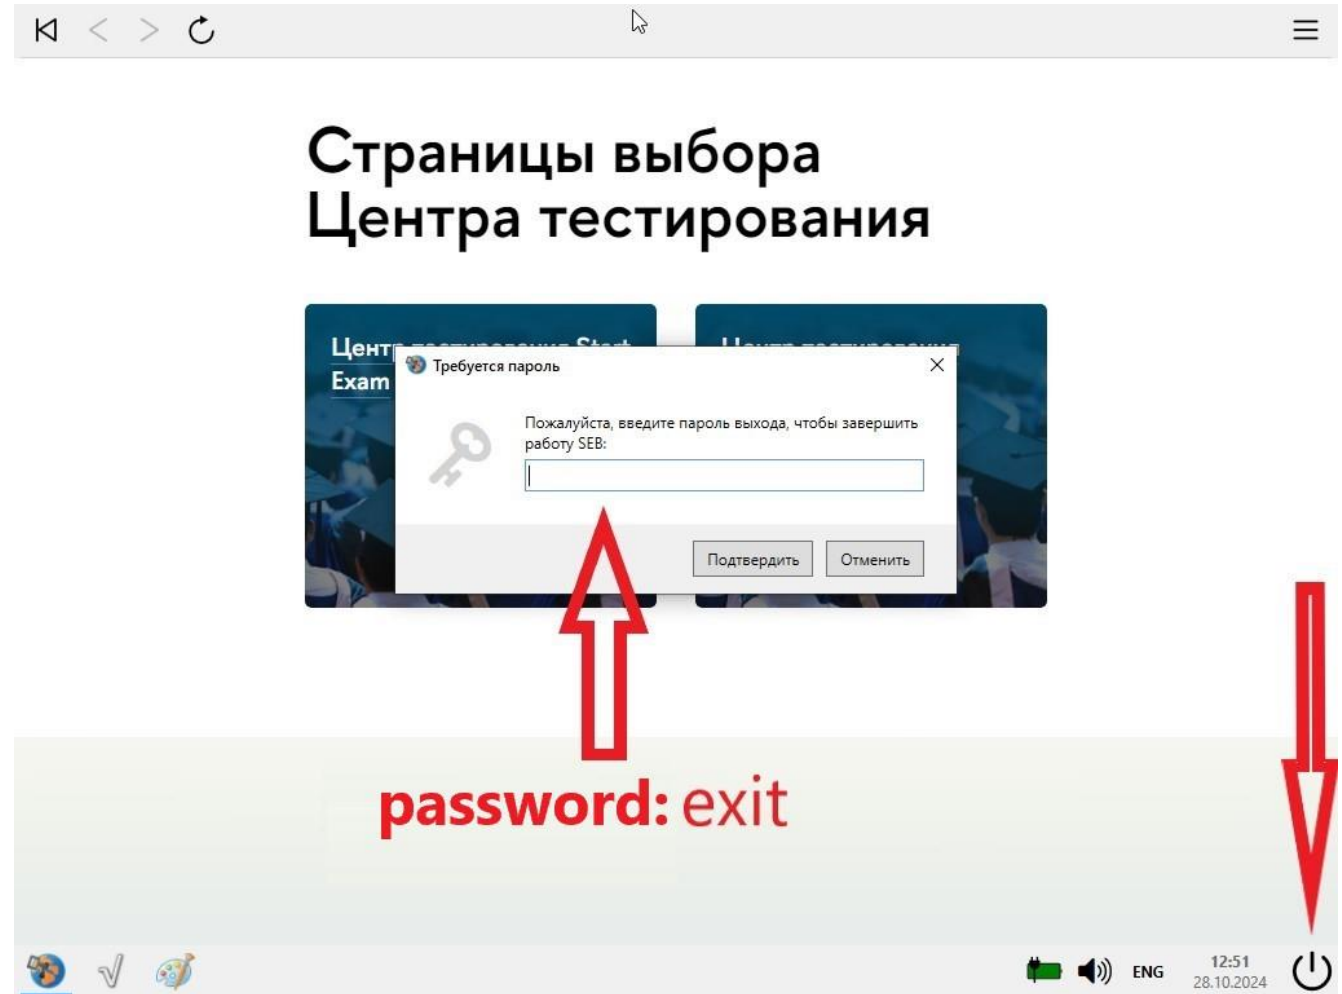

Does not save passwords and cookies

After the exam

After the exam, you must close the browser and reopen it for the next examinee. It is obligatory to reset the user's previous session data.

Exit password : exit

In case of SEB blocking

If there is a lockout, you must immediately notify the instructor and then enter the password: **exit**

In case of any problems contact technical support :
