Abstract. This document lists known errors in my papers with corresponding corrections.

Last updated: 22.11.2017

1 Mitsyuk A. A., Lomazova I. A., van der Aalst W. M. P. Using Event Logs for Local Correction of Process Models. MAIS, 2017.

In section Process Model Repair (page 3) we say, that the model can be discovered from the log: $[\langle a, b, c, d, e, f, g \rangle, \langle a, b, d, c, e, f, g \rangle, \langle a, b, c, d, e, h, b, d, c, g, f \rangle]$.

The correct variant is, of course, the following: $[\langle a, b, c, e, f \rangle, \langle a, b, d, e, f \rangle, \langle a, b, c, e, h, b, d, g \rangle]$.

In the same chapter we add trace $\langle a, c, b, e, f \rangle$ instead of $\langle a, c, b, e, f, g \rangle$ to the log.
