

PHENOMENOLOGY OF DARKNESS

스튜디오 허무것도 STUDIO HEOMUGEOTO

The international artist group presents works from their work cycle *Stages of Grief* during a tour through Russia in February 2019. By use of poetry, sound, text, drawing and printmaking the artists will create an intimate & profound narrative on the dark, lostness & different manifestations of absence.

This tour is part of their multi-year artistic research project. The topic death, fear, mourning & memory is being investigated in collaboration with interdisciplinary artists and in changing constellations. The project cycle is structured into different phases, that focus on specific aspects of grief and mourning. While the approach towards this topic remains indetermined regarding the artist's preferred practice, sound will be the primary tool to work closely with the topics.

Studio Heomugeoto will present exhibitions, artist talks as well as performances of experimental sounds & poetry.
